

Drive Revenue and Maximize Profits from Your Upgrade Selection Process!

Design Centre by Addison Stuart combines all your upgrade option data into one easy to use web interface enabling your sales staff to ensure they are always offering customers every item from every upgrade category. Design Centre manages all the costs to the end customer and the expense to the subcontractor ensuring the contractual terms are met. Design Centre helps you sell more upgrades and realize more profit.

DRIVE EFFICIENCY

Profitable Projects depend on efficient process that drive the installation of the right option, at the right time, in the right location. Design Centre drives that efficiency throughout your organization by enabling easy access to all information about the upgrade process and ensuring that everyone is working from the same set of data. This will eliminate costly mistakes.

CUSTOMER SUCCESS

Addison Stuart's Professional Services team partners with you throughout the duration of your project. Our industry experts help maintain your offerings and selection data across all product categories. This leaves your Design Center staff to focus solely on selling the right upgrades, delivering elegant properties and maintaining customer relationships.

Complete process for upgrade selections all in a single place

Replace Printed Catalogs with On-Screen Selections. No Books to lose

Tag Upgrade Categories as Required to ensure all selections are chosen

Generate Vendor Handoff Reports easily
(Change Orders)

Create Receipts with Sign offs to ensure End-To-End data completeness

Dates for Phase Selections can be tracked to send Selection notifications

Maximize Revenue:

Increase the number and value of selections made by having access to all possible options within an upgrade category allowing your sales staff to sell more

Ensure Completeness:

When you identify selections as required, the system will ensure a selection is made for those items which prevents costly delays

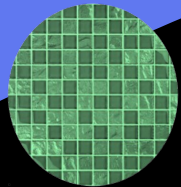

Improve Accuracy:

A single source of truth allows you to quickly access the latest data which reduces costly installation errors and confusion

Easy Deployment & Use:

Our easy-to-use web interface is available 24/7 in the cloud. No Infrastructure or IT staff is required by your organization

Design Centre Solves Big Problems

Who

Challenge

Design Centre Solution

Designer	Struggles to find the perfect items with a complete set of data in the right format	Design Centre keeps all the data in one location
Designer	Creating pricing models can be complex for these items	Addison Stuart will work with your Vendors to create pricing data
IT / Procurement	Keeping Vendor data up-to-date can be a nightmare	Pricing models are updated by Addison Stuart so everything is up-to-date
Procurement	Mistakes are often made tracking purchases and errors can be very costly	Product and Change Order information will be available to those that need it most
Sales / Design Centre	Sales Staff have dated pricing information that may not reflect stock-outs and changes	On screen options and pricing are available at the time of upgrade selection
Sales / Design Center	Customers are frustrated that they cannot get a complete view of all selection options	Required categories can ensure all relevant options are available to customers
Vendors / Trades	Rely on dated installation reports without the latest updates	Real time installation guides enable trades to view accurate information
